JavaScript	85%	**React**	80%
Firebase	85%	**Git & Version Control**	90%
GitHub	90%		

SERVICES

- Cross-Platform App Development (Flutter, Clean Architecture, Bloc/Provider)
- Creative Frontend Engineering (HTML, CSS, JavaScript, React)
- 3D Web Integrations (Three.js, GSAP, ScrollTrigger)

EXPERIENCE

2024 - Present

Senior Flutter & Web Developer

Appic Solutions

Leading the mobile app engineering division. Built and shipped 10+ cross-platform Flutter applications on iOS App Store & Google Play. Established standard styling and reusable UI modules.

2022 - 2024

Mobile App Engineer

Devsync Technologies

Collaborated with designers to build custom UI, connect REST APIs, add animations, state caching, and responsive frontend screens using HTML, CSS, JavaScript, and React.

EDUCATION

2019 - 2023

BS Computer Science

University of Central Punjab

Software architectures, database design, computer networks, HCI, and OOP. Graduated with honors.

FEATURED PROJECTS

Flutter E-Commerce Shopping App

Flutter, Dart, Stripe

Interactive product grids, category filtering, cart state system, simulated secure payments.

SaaS Financial Analytics Dashboard

React, Chart.js, Tailwind

Rich charts tracking sales, margins, retention; light/dark mode, glassmorphism.

Flutter Real-Time Messaging App

Flutter, Firebase, WebSockets

Secure chat with instant sync, offline caching, push notifications, media uploads.

AI SaaS Startup Landing Page

React, GSAP, Three.js

Award-style promo site with pricing cards, magnetic cursor, scroll reveals, particles.

Flutter Weather Neomorphic App

Flutter, REST API

API-driven weather app with location tracking and animated climate states.

Kanban Project Manager Web App

React, Node.js, MongoDB

Collaborative board with HTML5 drag-and-drop, ticket comments, task categories.
